YARDSCALE DIGITAL

AUTOMATION & CREATIVE

PROPOSAL · PREPARED FOR DESIGN CONTAINER JA

A WEBSITE THAT SELLS CONTAINERS WHILE YOU SLEEP.

A complete public presence for Design Container JA — the site, the buyer's guide that captures leads, and the system that delivers it — built, launched and handed over inside three weeks.

INVESTMENT

J$100,000

TIMELINE

3 weeks

PREPARED BY YARDSCALE DIGITAL · VALID 30 DAYS FROM ISSUE

WHERE YOU ARE NOW

THE PROBLEM IS NOT DEMAND. IT IS PROOF.

People are already interested in container homes in Jamaica. What they cannot easily do is find you, understand what you charge, and convince themselves you are legitimate — all before they are willing to call.

Right now the business lives on social media. That works well for reach and terribly for conversion, for three reasons:

SOCIAL SELLS THE LOOK. IT CANNOT SELL THE DECISION.

A buyer scrolling past a photograph is impressed. A buyer about to spend eight million dollars needs specifications, a price range, a process, and evidence that the structure is engineered and approvable. None of that fits in a caption, so the conversation stalls at "DM for price" — and most people never do.

EVERY ENQUIRY ARRIVES COLD, AND LANDS IN ONE INBOX.

DMs and WhatsApp messages have no structure. You are answering the same six questions by hand, several times a week, to people who may not own land yet. That is expensive in the only resource you cannot buy more of.

YOU DO NOT OWN THE AUDIENCE.

A follower is rented. If the platform changes what it shows, your pipeline changes with it, and there is nothing you can do. An email list of people who have raised their hand is an asset you keep.

> THE GAP IN ONE SENTENCE
>
> There is no place a serious buyer can go to answer their own questions at eleven at night — which is exactly when people make decisions about houses.

WHAT WE PROPOSE

A SITE, A GUIDE, AND A SYSTEM BETWEEN THEM.

Three parts. The site does the convincing, the guide does the capturing, and the automation makes sure nobody who raises their hand is ever forgotten.

01

The website

A premium single-page site that answers every question a buyer has before they contact you — models, prices, process, hurricane engineering, financing routes and approvals — so the people who do call are already most of the way to yes.

02

The buyer's guide

A 20-page PDF worth having: costs, import duty, parish council approvals, financing, and a site-readiness checklist. Given away free in exchange for a name and an email.

03

The lead system

The guide sends itself. Every enquiry is captured with the parish, the model of interest and the site notes already attached, and reaches you by email and WhatsApp within seconds.

WHY THE GUIDE IS THE IMPORTANT PART

Most people who encounter your business are not ready to buy today. They are eight months out, still deciding whether to build at all. A brochure site loses every one of them; there is nothing to do but leave.

The guide gives them a reason to hand over their details while they are still researching — and gives you permission to stay in touch until they are ready. It also does something a sales page cannot: it makes you the person who told them the truth about duty, approvals and what the price does not cover. That is the position you want to hold when they finally choose a builder.

> ALREADY BUILT
>
> The site and the guide in this proposal are not a description of what we would do. They are done, and you can look at both today — the link is at the end of this document. If they are right, we launch. If they are not, we adjust before you pay a cent more.

SCOPE

EXACTLY WHAT YOU RECEIVE.

Everything below is inside the price. Anything not listed here is not included — if you want it, we will quote it separately before doing it.

DELIVERABLE	DETAIL
Website	Single-page site: hero, model range with pricing, process, island engineering spec, configuration gallery, financing, FAQ, contact. Built mobile-first — most of your traffic is on a phone.
Buyer's guide	20-page A4 PDF, written and designed. Costs, import duty, approvals, financing, climate specification, builder questions, site checklist, glossary.
Lead capture	Two forms — guide download and viewing request — with spam protection, a branded thank-you page, and structured fields so every enquiry arrives with parish, model and site notes attached.
Automated delivery	The guide sends itself the moment somebody asks for it. You are notified by email; enquiries also reach you on WhatsApp.
WhatsApp integration	Floating chat button and pre-filled message links throughout, so a visitor is always one tap from a conversation.
Hosting & domain	Deployed on a global CDN with free SSL, set up on your domain. Fast everywhere, including on mobile data.
Search & sharing	Page titles, descriptions, sitemap, and a designed link-preview card so the site looks right when it is shared in WhatsApp.
Handover	A recorded walkthrough plus a written guide covering how to change prices, swap photographs and read your enquiries. You own everything.

NOT INCLUDED

Professional photography of your units; copywriting for social media; paid advertising management; logo or brand identity design; ongoing content. All available, all quoted separately — none of it needed to launch.

TIMELINE

THREE WEEKS, START TO LIVE.

Most of the build is already done. What remains is your content, your numbers and your sign-off — which is why this is three weeks and not three months.

WEEK 1	**Content and confirmation** You confirm the model names, the real prices and the specifications. We collect your phone number, email, logo files and any photographs you already have. One 45-minute call covers most of it.	YOUR INPUT
WEEK 2	**Build and revisions** Your content goes in, the guide is updated with your real figures, and you get a private preview link. Two rounds of revisions are included — we would rather you were specific than polite.	PREVIEW LINK
WEEK 3	**Launch and handover** Domain connected, forms tested end to end with a real submission, automation switched on. Walkthrough recorded, documentation delivered, accounts transferred into your name.	LIVE SITE
AFTER	**Two weeks of support** Included at no cost. Anything broken, confusing or not as promised, we fix it. This is not a support contract — it is us making sure the thing we handed you actually works.	INCLUDED

WHAT WOULD SLOW THIS DOWN

One thing only: waiting on your confirmed prices and specifications. Everything else is on us. If you can get us those in the first week, three weeks holds comfortably.

INVESTMENT

ONE PRICE. NO SURPRISES.

ITEM	JMD
Website — design, build, deployment	Included
Buyer's guide — written, designed, produced	Included
Lead capture and automated delivery	Included
Hosting setup, domain, SSL	Included
Handover, documentation and training	Included
Two weeks post-launch support	Included
Total — fixed	**J$100,000**

FOUNDING-CLIENT RATE

This is an introductory price. We are building our portfolio in the container and construction space, and in exchange for it we ask for three things: a short written testimonial once the site is live, permission to feature the work publicly, and an introduction to one other business you rate. Nothing more.

PAYMENT

STAGE	AMOUNT	DUE
Deposit	J$50,000	On acceptance, to begin work
Balance	J$50,000	On launch, once the site is live and you are happy

OPTIONAL, AFTER LAUNCH

Not required, and not part of the price above. If you would like us to keep the site maintained, add new models as you build them, and send you a monthly report of where your leads came from, we offer a care plan at **J$25,000 per month** — cancellable any time, with a month's notice. Decide after launch, once you have seen whether the site earns it.

THE DETAILS

TERMS, PLAINLY.

WHAT YOU OWN

Everything, on final payment: the site, the guide, the domain, the hosting account, the copy and the design files. No licensing, no lock-in, no monthly fee required to keep it running.

REVISIONS

Two rounds included during week two. Further rounds, or changes of direction after sign-off, are quoted at J$6,000 per hour before any work starts.

WHAT WE NEED FROM YOU

- Confirmed model names, prices and specifications
- Business phone, WhatsApp number and email
- Logo files, if you have them
- Any existing photographs of completed units
- One decision-maker who can sign off

TIMING

Three weeks from deposit and receipt of your content. Delays in providing content extend the timeline by the same amount — we will tell you when the clock is on you.

IF IT IS NOT RIGHT

If after the week-two preview you decide not to proceed, you owe nothing beyond the deposit, and we part on good terms. We would rather that than build something you do not want.

RUNNING COSTS AFTER LAUNCH

Hosting is free at your expected traffic. A domain runs roughly J$3,000 a year, paid directly to the registrar in your name. There is nothing else, and nothing payable to us.

VALIDITY

This proposal stands for 30 days from the date of issue.

NEXT STEP

LOOK AT IT BEFORE YOU DECIDE

The site and the guide already exist. Open the preview, read the guide the way one of your buyers would, and tell us what is wrong with it. If it is right, say the word and we will start on your content this week.

> PREVIEW LINK
>
> `[ PREVIEW URL — paste the live link here before sending ]`

ACCEPTANCE

READY WHEN YOU ARE.

Sign below, or simply reply to confirm — a message saying yes is enough for us to start. The deposit invoice follows within the hour.

AGREED SCOPE	AMOUNT
Website, buyer's guide and lead system, as scoped in this document	J$100,000
Deposit due on acceptance	J$50,000
