PROPOSAL · 02 SEP 2026

LEAD GENERATION · WEBSITE BUILD

Turn 39.3K likes into booked viewings.

The content already works. What's missing is somewhere for it to land — a site you own that captures the people your videos are already reaching, instead of losing them in a DM inbox.

JMD $50,000 50% DEPOSIT TO START

THE SITUATION

You've already done the hard part.

Most agents can't get attention. You have it. The price-anchored tours — *what $130K a month gets you in Phoenix Park*, *what $45M gets you in Red Hills* — are doing the job a paid ad would charge you for.

Three places the money leaks out

1

Your bio link sends people to someone else's platform.

It currently points at an Instagram profile. Every viewer you worked to earn gets handed to a second app that owns the relationship, shows them competitors, and can change the rules whenever it likes. You're renting the audience twice over.

OBSERVED 02 SEP 2026 — LINK IN BIO → INSTAGRAM.COM/NEXTMOVE…

2

"DM HOME for listings" only works while you're awake.

Every enquiry is a message you have to open, read, qualify and answer by hand. They arrive at 11pm, or while you're standing in a client's living room. The serious buyer and the person who'll never make it past a deposit look identical in the inbox.

OBSERVED — BIO CTA IS A MANUAL DM FUNNEL

3

51,700 people watched — you can't name one of them.

Views expire. A list doesn't. Without capture, every video starts from zero and the buyer who wasn't quite ready in September is gone by the time the right Portmore unit lands in November.

OBSERVED — NO OWNED CAPTURE POINT IN FUNNEL

THE BUILD

One site, built around how you already sell.

Not a brochure. A site shaped like your content — budget first, property second — so the person arriving from a video finds exactly what the video promised.

LANDING

Built for the bio link

The one page TikTok traffic lands on. Loads in under two seconds on mobile data, opens with the property they just watched, and asks for one thing.

CORE FEATURE

"What your budget gets you"

Your best-performing hook, made permanent. Visitors pick a price band — $100K/m, $130K/m, $45M, $69M — and see what's actually available in it.

LISTINGS

For sale & for rent

- Photo galleries, priced, filterable by parish and budget
- Beds, baths, sq. ft. and features at a glance
- Sold / Rented badges — your proof, working around the clock
- You add and edit listings yourself, no developer needed

LEAD CAPTURE

The form that replaces the DM

- Budget, buying or renting, preferred areas, timeline
- Financing status — pre-approved, in progress, not yet
- Lands in your email and your WhatsApp instantly
- Every lead stored and exportable — the list is yours

CONTACT

One tap to you

- Click-to-chat WhatsApp, pre-filled with the listing they viewed
- Click-to-call on (876) 396-0411
- Viewing request booked straight into your calendar

FOUNDATIONS

Yours, and findable

- Mobile-first — where all of your traffic comes from
- Google-indexed for "houses for rent Portmore" and similar
- Link previews that render properly in WhatsApp
- Your domain, your hosting, your logins

Everything is branded to you — not to us.

A.S. James & Associates alongside your own name and face. You are the reason people follow the account; the site should look like the person in the videos.

HOW A LEAD TRAVELS

From a view to a viewing.

01

They watch the video

Same content you're making now. Nothing about your posting changes.

02

They tap the link in bio

It now goes to your site instead of another social profile. The property from the video is the first thing they see — no hunting, no drop-off.

03

They tell you what they can spend

Budget, area, buying or renting, how soon, financing status. Thirty seconds, four fields. The people who won't fill it in were never going to buy.

04

It reaches you already qualified

Email and WhatsApp, the moment it's submitted. You open a lead knowing the budget before you've typed a word — and you decide who's worth the drive.

05

The rest stay on your list

The buyer who isn't ready until January is saved, not lost. When the right unit comes up, you already know exactly who to call.
