THE LINK IN YOUR MESSAGE NEEDS SOMEWHERE TO LAND

A booking page built for the traffic you are already generating by hand — so the people who tap that link can hire you on the spot instead of reading about you and leaving.

TOTAL INVESTMENT	DEPOSIT TO BEGIN	BUILD TIME
J$50,000 JMD	J$25,000 50%	3 weeks

WHERE THIS CAME FROM

YOU ARE ALREADY DOING THE HARD PART

You reached out to us directly. The message was clear about what you offer — a live band, PA systems, DJs and a support team that knows how to run a room — and it ended with a link. That is outreach most businesses never get around to doing, and you are doing it by hand, one conversation at a time.

Then the link goes to an about page.

Someone with an event in six weeks reads your message, gets interested enough to tap, and arrives somewhere that tells them who you are rather than asking them what they need. There is nothing wrong with that page. It is just not the page that converts the click you worked for. **The outreach is working; the destination is not built to catch it.**

01

The effort is manual

Every enquiry costs you a message you typed yourself. That is real work, and right now it is the only thing bringing people in.

02

The click has nowhere to go

An about page answers “who are you”. It does not answer “are you free on the 14th, and what will it cost me”.

03

Nothing is captured

People who tap and leave are gone. No name, no date, no event type, nothing to follow up on next week.

WHAT WE PROPOSE

ONE PAGE, ONE JOB

We build you a single booking page and point every link you send at it — the DMs, the bio, the posts, the flyers. It opens fast on a phone, because a phone is what your traffic is on. It says what you do, shows the four things you hire out, and then does the one thing your current destination does not: it asks for the date.

Two ways to reach you from that page. A short enquiry form for the people who want to think, and a WhatsApp button for the people who want to talk now. Both land with you the same day, with the details already attached.

This is a one-off build, fixed price, fully handed over. When it is done it is yours — the files, the hosting account, the domain, all of it. Nothing you run afterwards depends on us.

SCOPE OF WORK

WHAT GETS BUILT

S-01

The booking page

A single page, built mobile-first: the offer up top, your four services broken out — live band, PA and sound systems, DJs, event crew — and a clear path to enquire from anywhere on the page.

S-02

Enquiry form that asks the right questions

Event date, event type, venue or parish, rough guest count, and which services they need. It arrives in your inbox already qualified, so your first reply can be a real answer instead of five questions.

S-03

One-tap WhatsApp booking

A button that opens WhatsApp with the message part-written. The person only has to add their date and hit send — which is the difference between an enquiry and a page view.

S-04

Gallery and proof

A section for your photos, video and past events, plus room for client quotes. Built to take the material you already have — we will tell you exactly what to send and what is missing.

S-05

Link previews that actually render

Right now your link travels through WhatsApp and Instagram as bare text. We set the title, description and preview image so the URL unfurls into a proper card every time you paste it.

S-06

Found on search, locally

Page titles, descriptions and structure set up for the terms people actually type — sound system rental, live band hire, DJ for hire — plus your Google Business Profile claimed and pointed at the new page.

S-07

Hosting, domain and speed

Deployed on managed hosting under your own account, wired to your domain with SSL. Built as a static page so it loads in about a second on mobile data, and costs nothing per month to keep online.

S-08

Handover and a walkthrough

A live session where we hand you the accounts and show you how it works, plus written notes for changing your own copy, prices and photos later without calling anyone.

NOT IN THIS BUILD

WHAT THIS QUOTE DOES NOT COVER

Listed so there are no surprises. Each of these is something we build, and each can be quoted separately once the page is live and we can both see what it is doing.

- **An AI booking agent** that answers your DMs on WhatsApp, Instagram and TikTok in your voice, quotes your prices and books the job.
- **Content production** — filming, editing, captions, or running a posting schedule for you.
- **Paid advertising** and any media spend that goes with it.
- **Photography and videography** of your events. You supply the images; we place them properly.
- **Logo or identity design.** We work with the brand you have.
- **Ongoing changes after handover.** You will be able to edit your own copy and prices; structural work is quoted when you need it.

HOW IT RUNS

THREE WEEKS, START TO HANDOVER

01

WEEK ONE · AFTER DEPOSIT CLEARS

Call, content and structure

A working session to get your prices, packages, service details and the questions you get asked most. You send photos and video; we come back with the page structure and the copy for your sign-off.

02

WEEK TWO

The build

The page gets built and put on a private link you can open on your phone. You see it coming together as it happens, not at the end.

03

WEEK THREE

Revisions, launch, handover

Two rounds of changes, then the domain gets pointed and the page goes live. We walk you through the accounts, hand over the notes, and you start putting the new link in every message you send.

INVESTMENT

FIXED PRICE, SPLIT IN HALF

One number for the whole build, agreed before anything starts. It does not move — not for revisions inside the two included rounds, and not because something took us longer than we thought.

TOTAL — SCOPE ITEMS S-01 THROUGH S-08

J$50,000 JMD

DEPOSIT · REQUIRED TO BEGIN — J$25,000 — 50%

Due on acceptance. This is what books your slot in the schedule and starts week one — no work begins before it clears.

BALANCE · ON HANDOVER — J$25,000 — 50%

Due once the page is approved and live. Accounts and ownership transfer to you on the day it settles.

TERMS

THE SMALL PRINT, KEPT SHORT

QUOTE VALIDITY	This price holds until 20 September 2026. After that we would want to re-quote, most likely at the same number.
DEPOSIT	J$25,000 on acceptance. It secures your place in the build schedule and is non-refundable once week one begins, though it can be moved to a later slot if you need to reschedule before we start.
REVISIONS	Two rounds included, gathered as one list each time. Further rounds, or changes to scope agreed here, are quoted before any work on them starts.
WHAT YOU SUPPLY	Logo files, photos and video, your service list and prices, and access to your domain. We will send a single checklist in week one so nothing gets chased twice.
TIMELINE	Three weeks from the day the deposit clears, assuming your material and sign-offs come back inside a few days. Delays on either side move the date, and we will tell you as soon as one does.
OWNERSHIP	Everything built here transfers to you in full on final payment — the code, the page, the hosting and the domain, in accounts registered in your name. No lock-in and nothing held back.
THIRD-PARTY COSTS	Your domain renewal is yours. Hosting for a page this size sits on a free tier and is expected to cost nothing; if that ever changes we will tell you before it does.

NEXT STEP

TWENTY MINUTES ON A CALL

Before you commit to anything, get on a call with us. Bring your real numbers — what you charge, how many enquiries you get in a month, how many turn into bookings. You leave with a next step either way, hired or not.
